Professional Experience

Wishtree Technologies LLP Jan 2022 – Present

Software engineer *Pune - India*

Webstore platform for HVAC contractors and dealers Jun 2026 – Present

Technologies : *Spring Boot, Angular 11, Hibernate, MySQL*

Tools : *IntelliJ IDEA, Selenium, Jenkins, Apache Solr, Docker*

- Performed debugging and efficiently resolved issues during support phases.
- Worked directly with clients to troubleshoot and resolve production issues, demonstrating strong problem-solving, communication, and client collaboration skills.
- Developed a UI feature to trigger search index rebuilding directly from the application interface.
- Worked on client-raised change requests, implementing enhancements and modifications based on business requirements.

Vision – Contract Analysis and Data Extraction Platform Apr 2026 – Present

Technologies : *Java 8/11, Jackson, JasperReports, PostgreSQL, Batch scripting*

Tools : *IntelliJ IDEA, Gradle, Jenkins, SonarQube, Nexus, Snyk, Git/GitHub*

- Rewrote the Jenkins CI/CD pipeline in declarative format, and added SonarQube analysis, Nexus repository resolution and automatic versioning to every Gradle module.
- Fixed security vulnerabilities (CVEs) by upgrading Jackson (2.13 to 2.21) and JasperReports (6.3 to 6.21), including replacing deprecated Jackson code to make deserialization safer.
- Used Gradle dependency locking so Snyk could find hidden transitive CVEs, and managed versions across modules (product version 34.x to 35.0.0).
- Wrote a build automation script and rewrote the README, which made building all components and onboarding new developers simpler.

DocGen – Enterprise Document Generation Platform Mar 2026 – Present

Technologies : *Java 17, Jakarta EE 10, Spring Framework 6, Apache CXF 4, JAXB 3, EhCache 3, PostgreSQL, React*

Tools : *Apache Tomcat 10.1, Apache Ant + Ivy, Maven, Jenkins, Docker, JUnit, Allure, Snyk, IntelliJ IDEA, Bash*

- Led the migration of an enterprise application to Jakarta EE 10, upgrading Tomcat 9 to 10.1, Spring Framework 5 to 6, and Hibernate 5 to 6.
- Identified and resolved critical security vulnerabilities, including XXE, SQL Injection, XSS, and HTTP Response Splitting, enhancing application security.
- Modernized application dependencies, configurations, and legacy components to ensure compatibility with the latest enterprise Java technologies.
- Troubleshot and resolved platform migration regressions across Spring Security, Hibernate, JAXB, JSP, and web services.
- Expanded the automated unit test suite to 1,600+ test cases, improving application reliability and regression coverage.
- Integrated automated unit test execution into Jenkins CI/CD pipelines, enabling continuous build validation and early detection of regressions.

eProcurement System Aug 2023 – Mar 2026

Technologies : *Spring Boot, Angular 11, Hibernate, MySQL*

Tools : *IntelliJ IDEA, Selenium, Jenkins, Apache Solr, Docker*

- Expanded technical expertise by integrating tools and technologies like Docker, Jenkins, Apache Solr, and Snyk to boost project efficiency and effectiveness
- Developed end-to-end UI automation test cases using Selenium, strengthening testing capabilities
- Performed debugging and efficiently resolved issues during the development and testing phases.
- Collaborated directly with clients to address and resolve production issues, demonstrating strong problem-solving and communication skills
- Contributed to the successful migration of the project to updated Java and Spring Boot versions

- Led the development team, assigning tasks, monitoring progress, and ensuring seamless collaboration

IAS OMID Test Harness July 2022 – Aug 2023

Technologies : *Java, Kotlin, Swift, Bright Script, HTML, and JavaScript*

Tools : *Android Studio, Xcode, Tizen Studio, Visual Studio Code, Charles*

- Worked on multiple modules for Roku TV, Amazon Fire TV, Apple TV, Android mobile, and iPhone devices
- Developed mobile and CTV applications, ensuring smooth functionality across multiple platforms.
- Used Java and Kotlin for Android mobile applications, Fire TV, and Android TV applications
- Used HTML, CSS, and JavaScript for Samsung TV application development
- Used Bright Script for Roku TV application development
- Used Swift for Apple TV applications and iOS devices
- Integrated the OMID Library for event tracking, log generation, and performance measurement.
- Implemented XML parsing, network calls, multiple types of ads for all devices, multiple types of ad scenarios, and many more whenever necessary

Education

U.V.Patel college of engineering, Ganpat University Gujarat, India
B.Tech Computer Engineering *2019 - 2022*

B.S.Patel Polytechnic, Ganpat University Gujarat, India
Diploma in Computer Engineering *2016 - 2019*

Technical Skills

Software/Languages: Java, Kotlin, Servlets, Angular, XML, HTML, CSS, JavaScript, Apache Solr, Docker, and Jenkins
Frameworks: Spring, Spring Boot, Hibernate, Web Services- REST
Database: MySQL, MongoDB
Testing: Unit testing using Junit, Mockito, UI Test Automation - Selenium
Tools/IDE: Eclipse, Visual Studio, Android Studio, Xcode, IntelliJ, Snyk, Microsoft Azure, Selenium Grid, GitHub, and Postman

- Expertise in designing Java applications using SpringBoot, Spring, Hibernate, and Web services (RESTful)
- Have progressive experience in Software Development Life Cycle (SDLC), including User interactions, Business Analysis/Modeling, Development, Implementation, Integration, Documentation, Testing, and Deployment using Java
- Have good knowledge about Apache Solr, Docker, and Jenkins, and basic knowledge about Selenium Grid
- Experienced in UI frameworks such as Angular
- Developed web applications using Angular and Bootstrap in dynamic, fast-paced environments.
- Experienced in configuration and management of RDBMS systems like MYSQL
- Experienced in document databases, such as MongoDB
- Hands on experience with persistence layer using SQL, Hibernate, JPA, etc.
